San Andreas Sanitary District Starts Construction on One of the First Projects to be Funded by Stimulus Monies

San Andreas, CA...Today the San Andreas Sanitary District (SASD) officially broke ground on improvements to the wastewater treatment plant that will enhance water quality in the North Fork of the Calaveras River. As a bonus, the project qualified to receive monies from the Clean Water State Revolving Fund (CWSRF) which was in turn funded by the American Recovery and Reinvestment Act of 2009 (ARRA). SASD is one of the first agencies in the state to receive this funding....

Trickling Filter at San Andreas Wastewater Treatment Plant

These improvements will not only bring the District's wastewater treatment plant into compliance with state regulations and create an estimated 30 jobs in the community, but will be primarily funded by a federal grant. The cost for the required improvements is \$10.5 million, which would have been underwritten by the ratepayers.

The grant package will provide \$5.8 million in cash and \$4.7 million in a 30-year, one percent interest loan. Rocklin based ECO:LOGIC Engineering planned

and designed the improvements and worked with District Manager Steve Schimp to secure the grant package.

The Board and manager, Steve Schimp, have done everything right throughout this very complex process and it is fitting that a well-run operation be rewarded with a significant grant," said David Bennett, CEO of ECO:LOGIC Engineering.

06:00 PM Concert Volunteer Meeting at Ironstone

The San Andreas Wastewater Treatment Plant project was eligible to apply for the CWSRF funds because it is a publically owned treatment facility in need of regulatory upgrades.

blower building, secondary clarifier, RAS pump station, scum pump station, tertiary flocculation, filtration and chemical augmentation facilities and

improved disinfection facilities. The project also includes standby power and all the associated site improvements required for a complete facility.

The improvements will be constructed by Auburn Constructors and are expected to be completed by June, 2010.

About the Clean Water State Revolving Fund

08:00 AM Valley Springs Farmer Market

The Clean Water State Revolving Fund (CWSRF or SRF) program is a grant and low interest loan funding program to implement water quality projects. It was established by the Clean Water Act (amended 1987) and is funded by Federal grants, State funds, revenue bonds and now American Recovery and Reinvestment Act of 2009 (ARRA) funds. The CWSRF was most recently amended in March, 2009 to comply with ARRA funds. The primary purpose of the CWSRF program is to implement the CWA and various State laws by providing financial assistance for wastewater treatment facilities necessary to prevent water pollution and thereby protect and promote health, safety, and welfare of the inhabitants of the State.
